User opinions That's what people say about Organize Music possibilities:"On our radio station, as on any other, is stored a large amount of MP3 music files. Some of them are played regularly, some of them not. To find needed music record in our audio archive, where are stored the millions of files, is very hard. We had to hire a special employee, who categorized records in archive, but even such salvation was not perfect - we periodically received several thousands of records in a day, and a person who organized them, could not organize them all and made a lot of errors. All this unorganized music records collected, collected and collected... One day while real-time broadcasting music clips, prepared to transmission, were lost in all this chaos and we were forced to break transmission. My colleague from another radio station called me, when knew about incident, and advised to use Organize Music. Over several hours all our thousands of MP3 music files were organized and even if we are gathering several thousands of new audio records at some days, Organize Music easily append them to common music base - right from audio CD's! Thanks very much all Organize Music developers. Program, that they made, really helps people."

James Tilton, sound producer of radio-station "Voice of Colorado",

James.Tilton@ColoradoRadio.com "At April issue of "My Computer" magazine I read that Organize Music is the easiest and most user-friendly way to sort, rename and organize MP3 files. I have large MP3 file collection on my computer. Several first years it was easy to maintain it, but now, when I periodically download variety of MP3 files from Internet it became very hard to find something in my MP3 files collection. I did not know what to do - variety of folders and in every of them are MP3 music files those I even never heard. I even wanted to stop collecting of MP3 files, but suddenly come in mind that article - and I downloaded and started Organize Music. It was like a miracle - all my MP3 files were sorted, renamed, organized automatically, exactly as I wanted. Really useful MP3 music organizer - It is needed for everyone who has MP3 files and wants them to be in ideal order."

Christopher Garvin, music collector, ChrisGarvin@Mp3.com Organize Music can Organize all types of Music and Photos

Music organizer - for what music organizer is created? Music organizer not just organize MP3 music files, is is not just an organizer for MP3 music files, MP3 music organizer for music of all types, file organizer for photos in all formats or a file organizer for videos. Organize Music - is a solution to organize, sort and rename all types of files - Organize Music will organize MP3 files (music organizer support this popular music format). Organize Music organize music in variety of music formats - OGG, AC3, WMA, and many others. Organize Music organize MP3 music files in uncompressed formats - WAV, AIFF and AU. Also this music organizer sort, organize and rename music files in all existing lossless compression formats - FLAC, APE, WAV Pack, TTA, Apple Lossless and many others. And, of course, MP3 music organizer sort, rename and organize mp3 music files compressed in all lossy compression formats. Here we tell more about this music

formats. First, it is MP3 (this abbreviation means MPEG-1 Audio Layer 3). This music format is organized, sorted and renamed using Organize Music and is presented on most part of personal computers, notebooks, music players. A whole hard drives are filled with MP3 music files (MP3 music) and Organize Music can organize, sort and rename all this MP3 music files, organize and sort exactly as you want. MP3 music format was created by several engineer teams in United States (AT&T Bell Labs) and Germany (Fraunhofer IIS). Our company (Organize Music, Inc.) also mad contribution in MP3 music format development while Organize Music development process (while appending to Organize Music mp3 music organizing, automatic sorting and renaming support). Because music organizer organize, sort and rename MP3 music of all types (with ID3v1, ID3v2, ID3vx and all other of ID3 MP3 music tags) it may be named MP3 music file organizer. Organize Music is very useful for everybody who has MP3 music files on computer, MP3 music files on notebook or music player - all they will be automatically organized, renamed and sorted with Organize Music.

Organize Music and OGG - now we will tell about how all your OGG (also known as Vorbis) music files will be organized, renamed and sorted automatically with Organize Music. Another popular music format (in addition to MP3), organized by Organize Music, is Vorbis. Music files of such type usually have OGG or OGA extension and are also organized, sorted and renamed by Organize Music. OGG music files organizing and sorting support was appended to Organize Music in 2005, after 3 years after first OGG music file format was published (it was published in 2002 year). It is not used so widely as MP3 music file format, which become popular in the late 1990-s and today is the most popular music file format for consumer electronics (and its support was appended to Organize Music in the first order). OGG music file format is maintained by Xiph Foundation, with which we made close relations while appending OGG music file organizing support to music organizer software. So, OGG music format is becoming more and more popular, especially for game soundtracks, and all music files (both OGG and OGA) are organized with Organize Music.

Next popular music format, music files in which are organized by Organize Music, is WMA. This abbreviation means Windows Media Audio. WMA music format was developed by Signal Processing Group at Microsoft Research Center. WMA music format support was appended to Organize Music already after 6 months from WMA music file format official release. Music files in this format have very high compression level - Microsoft Corporation claims WMA music on 64 kbps gives listeners a "CD music quality", so everyone who want to decrease his music collection size, may convert music files in it to WMA and organize them with music organizer. Organize Music, in addition, will remove duplicate music files and music collection size will decrease without decreasing of music collection quality.

Today is becoming more and more popular AAC music format, music in it is also organized, sorted and renamed automatically by Organize Music. AAC abbreviation means Advanced Audio Coding. Music in this format is organized and sorted by Organize Music and you may see it as music files with M4A, M4P and 3GP file extensions. Organizing and organizing of 3GP files using automatic Organize Music is very urgent today because files in this format carry music and video for mobile devices. AAC music file format is organized, sorted and renamed by Organize Music on computer of everybody who has Sony's PlayStation, Nintendo and other music tracks from popular game devices. Organizing, sorting and renaming of AAC music files is especially actual for gamers and other people who want to organize music files from PlayStation games using Organize Music. Also AAC music files are good known music format for all who use Apple devices - with Organize Music you may organize all files with AAC music inside for your iPod, iPhone and iTunes. So, all AAC music will be in ideal order being organized by Organize Music.

More about 3GP music file format and how 3GP music files are organized with Organize Music. Yes, Organize Music sort all types of 3GP files, including those has 3GP and 3G2 file extensions. All 3GP files are sorted, organized and renamed automatically with Organize Music (that is also music sorter and music renamer). Some words about 3GP format: it is a simplified version of MP4 music and video files. 3GP music and video files are used on GSM-based mobile phones, so Organize Music may be useful to organize music and video files for your mobile phone. For CDMA-based phones are used 3G3 music files and Organize Music will organize all your music and video files if you are owner of CDMA phone.

Music organizer that organize all popular music file formats is very good but how about situations when you have music files in your collection other than MP3 music files and need to organize music files with Organize Music? All music files, even in rare music formats, can be easily organized, sorted and renamed with Music organizer. For example, Organize Music will automatically sort, rename and organize music files in Musepack format. Musepack music file format, also known as MPC, was created in 1997 by Andree Buschmann and is currently maintained by MDT (Musepack Development Team). Our music organizer, music renamer and music organizer can sort, rename and organize MP3 music files of all types including those who have MPC, MP+, MPP file extensions. Organize Music can organize all types of music files with that file extensions, video files may not have MPC extensions, because Musepack file format can compress only audio (music) data.

Organize Music also may organize music files, compressed in Dolby Digital music file format. Also, Organize Music can organize music files in all music formats, created by Dolby Laboratories, including AC-3. This music file format is very qualitative and was demonstrated to the wide public for the first time at May 1999 at the presentation of film "Star Wars Episode 1". As you now see, high-qualitative sound tracks in AC-3 music files also are organized in automatic mode using the Organize Music.

Our Mission: With Organize Music all Music will be in Ideal Order

Music organizers - why music organizers and music organizing are so important now? Today life is impossible to imagine without information, and information - without files. By reports, provided by independent researches, now more than 95% of information is stored in files.

Let's look on music organizer history and the history for music file storages, which are connected with each other very closely. In 1970's, when first floppy disk was invented, it had 0.1 Megabyte size and often holds up to 15 files. It is less than 1 MP3 music file and you do not need MP3 music file organizer to organize MP3 music files inside of such file storage. In 1980's was invented CD disk, which already had 500 Megabyte size and could hold already thousands of files. Storing MP3 music files on such memory device you already need several hours to organize MP3 music files manually without some sort of automatic music organizer, music renamer or music organizer. In 1990's became popular DVD disks, which could carry already dozens of thousands of files. To organize MP3 music files, stored on a single DVD disk, for example by artist and album, it may be needed already of whole day to do it without some sort of automated MP3 music organizer, MP3 music sorter or MP3 music renamer. Today most of MP3 music files are stored on HDD (Hard Disk Drives), which are presented in every computer. Such hard drives have size beginning from 80 000 Megabyte and already hold millions of documents. Such amount of MP3 music files (thousands and thousands of MP3 music files to sort, organize and rename) already may not be organized, renamed or sorted according to your preferences without using of full-automatic MP3 music sorter, MP3 music renamer or automatic MP3 music organizer.

Organize Music is needed every day more and more because more and more MP3 music files need to be sorted, organized and renamed every day. For example, several weeks ago was already started production of Hard disk with 900 000 Megabytes size, that is able to store already milliards of documents in variety of formats. And all this documents (MP3 music files, JPEG photo files, AVI video files and many others) should be sorted, organized, renamed and catalogued. It already may not be done manually - human person may not be used as the music organizer.

Organize Music and your computer: when on a computer is stored such variety of MP3 music files, especially if they are packed in numerous of archives, it is extremely hard to navigate between them. People often don't know, what files and where are stored.

So, what we see without MP3 music organizing with Organize Music? When in a folder are several hundreds, or even thousands of files with names like "690info.txt", "important(14).doc", "mp216.rar", "confer37.avi", "d12.zip" it will be needed days, or even weeks and months to understand, what is what, organize, rename all and move all in folders, according to content.

Now you see - the whole directories are deleted, because there is no possibility to find out, what is inside and use such content. You are in the danger! Is any salvation of such heavy situation? Yes, and it is - Organize Music. This automatic MP3 music organizer, MP3 music renamer, MP3 music sorter and MP3 music cataloguer will sort, rename and organize all your files, MP3 music, photos, videos and other media automatically. Just press Download button - all your music, photo, video files will be in ideal order with such powerful music organizer, music manager and music cataloguer as Organize Music!
